

## Shimizu Corporation chooses Greencast for the award winning Sky Habitat@Bishan project

Greencast, the trusted lightweight precast concrete wall manufacturer announced today that Shimizu Corporation has selected Greencast ecoWall™ to be used for the award winning Sky Habitat residential project at Bishan.

Being a renowned global contractor, Shimizu is very concern with quality of materials used in their projects. They will undergo detail analysis before selecting the right materials brands. Being an A1 contractor under the BCA Contractor directory, they have managed to develop high standard finish projects. Shimizu launches its Singapore operation in 1973 and has consistently answered the demands of a vibrant economy for quality buildable design and construction since then. They have also achieve numerous BCA awards for construction excellence and best buildable design. Shimizu has also continued to attain quality, safety and environmental standards to meet customer and regulatory requirements.

Greencast was given the chance to work alongside with Shimizu for the project after multiple rounds of selection process. Due to the extensive usage of the eco-friendly patented precast wall system, the Compac™ green wall has helped Shimizu attain BCA Green Mark Gold Plus award.

Since the Compac™ green wall is used as partition walls between units, the residents will be able to enjoy a comfortable and healthy lifestyle because the Compac™ green wall system is stable throughout its life cycle and does not need chemical treatment to protect it against rot and insect attack. This is an important aspect for end users because it means that there are no residual emissions or hydrocarbons to affect one's health.
